More Aggressive Course Possible. General Huerta's decree taking unto himself legislative as well as executive powers has swept aside all hope here that the Huerta regime will re-establish constitutional government or be able to cope with the increasingly vig-orous fighting of the constitutionalists. Both President Wilson and Secretary Bryan are turning over in their minds the possibility of a more aggressive road advices received here tonight. course of action by the United States. Three methods of dealing with the situation are being suggested as open to the Washington government:

May Demand Elimination of Huerta. First-There is the ever-recurrent aggestion in official circles of a military and naval demonstration which would serve as a precautionary move in case a forcible policy is later re-oured. For the present, however, the resident and his advisers are concentrating on a constructive solution by the use of peaceful measures. While the American charge, Nelson O'Shanghnessy, professes to expect no reply whatever to the Washington memorandum, and the foreign office cays that there will be none for the time being, it is still regarded as certain that the nature of the American evernment's notification regarding future recognition will necessitate action on the part of the Mexican authorities.
